

El Gran Laberint

Is a large format labyrinth, combining some of the mechanical challenges and visual puzzles of previous labyrinths. It is a semi-transparent structure that transforms the space, revealing part of its content.

Attracted by their curiosity, the audience enters into a network of paths and bends that is, at the same time, a game and a performance, thanks to its interaction with the installation.

El Gran Laberint

Technical details

- The structure is supple: its shape may be adapted depending on the environment conditions (trees, street lamps...)
- Very autonomous installation, no anchorage needed
- Equipped with lamps for night sessions

Electricity / water supply: Not needed

Set up: 5 hours

Take down: 3 hours

Space: a fairly flat area of 400m² with access for 2 vans and parking area nearby

Staff: 3 technicians of the company assemble, dismantle and take care of possible repairs

Standard dimension: up to 250m²

Ask the company for spaces with different dimension

Cast

Design and construction:

Furti Coromina and Paco Hernández

Production

Jordi Armadans and Itinerània
